

Streaming Music Services

Music lovers have access to an extensive array of streaming services natively available for playback on their Autonomic system.

STREAMING SERVICES CATEGORIZED

Each streaming music service provides a different and unique experience to its listener. We have found that each service can be categorized into three types of services: Library, Broadcast, and Custom Radio. It's common for most households to have subscriptions to at least one service within each category for a broadened listening experience.

So, what are these categories and what services fall within them?

LIBRARY

These services allow you to curate content the way you prefer. They also suggest pre-curated playlists for quick listening.

BROADCAST

Much like AM/FM radio, tune into your favorite local or national radio programs.

CUSTOM RADIO

Select your favorite artist, song, or genre and let the service curate your listening experience. Most services will allow you to modify the program by liking or disliking tracks.

*Using Spotify Connect

COMMERCIAL STREAMING

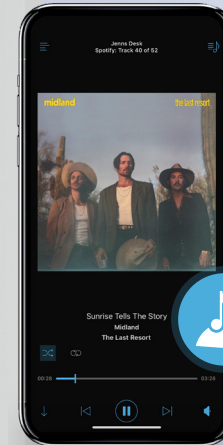

Autonomic players support a variety of commercial streaming music services with music licensing built into their subscription plans. Commercial venues have the option to explore ASCAP music licensing for greater flexibility in services to use within their establishment.

DISCOVER MORE WITH

At the push of a button TuneBridge will allow the user to start exploring new music across streaming services based on what's currently playing.

STEP 1 SELECT TUNEBRIDGE

Select the TuneBridge icon from the now playing menu on the Autonomic app or web user interface. TuneBridge may also be available as an "action" within control system menus.

STEP 2 EXPLORE SERVICES

Select the streaming service to explore. The now playing metadata will be used to search on other services. Streaming service accounts are required to populate options to explore.

STEP 3 SELECT YOUR FINAL ACTION

Start exploring new content by creating a new custom radio station or dive into an album you never heard before. Or, save what you're currently listening to as a favorite to recall later.
